B. Tech 4th Semester Mechanical Engineering

MANUFACTURING PROCESSES (PCC-ME-405/21)

2nd Sessional Test, May 2025

Max. Marks: 15

Time Allowed: 90 minutes

Note: Attempt any three questions.

Q. No.	Statement	Marks	CO
1 (a)	Explain different types of tool wear.	5	C04
(b)	The relationship between cutting speed V and Tool life T is given by $VT^n=C$. With $n=0.5$ and $C=120$, the percentage increase in tool life when cutting speed is reduced by 50%.	5	C04
2	Discuss Gear hobbing process in detail.	5	C03
3	Discuss the working principle of the following welding processes: (i) Resistance Welding (ii) Gas Welding	5	C05
